

Dog Boarding Information:

For those of you who need boarding facilities, the following are ones that our clients have recommended. We suggest that you visit each one to determine which one would best suit your needs. They are very different in what they offer, however, they are all very reputable. Please make your reservations ahead of time, as good boarding places will fill up fast, especially around the holidays, just as good hotels do. Don't forget to make sure that your pet is current on all vaccines, especially Bordetella, which is required by ALL boarding facilities. This vaccine needs to be given to your pet 7 to 10 days before you board your pet. You will also need proof from your veterinarian that all of your pet's vaccines are up to date.
