

Frequently Asked Questions

Does it hurt? What does treatment feel like?

There is little or no sensation during treatment. Occasionally one feels a mild, soothing warmth or tingling.

Are there any side effects or associated risks?

During more than 20 years of use by healthcare providers all over the world, very few side effects have ever been reported. If a patient is allergic to light then they may get a rash or blister for a few days, as the healing response is more active after treatment.

How long does each treatment take?

The typical treatment duration is 5-15 minutes depending on the size of the area being treated and the condition being treated.

How often should the patient be treated?

Acute conditions may be treated daily, particularly if they are accompanied by significant pain. More chronic problems respond better when treatments are received 2-3 times per week tapering off to once a week or once every other week, with improvement.

How many treatments does it take?

This depends on the nature of the condition being treated. For some acute conditions, 1-6 treatments may suffice. Those of a more chronic nature may require 10-15 (or more) treatments. Conditions such as severe arthritis may require ongoing periodic care to control pain.

How long before the results are felt?

You may feel improvement in your condition (usually pain reduction) after the very first treatment. Sometimes you will not feel improvement for a number of treatments. This does not mean that nothing is happening. Each treatment is cumulative and results are often felt after 3-4 sessions.

Can it be used along with other forms of treatment?

Yes. Laser therapy is often used with other forms of therapy, including physical therapy, chiropractic adjustments, massage, soft tissue mobilization and electrotherapy. It is also used after surgery. Other healing modalities are complementary and can be used with laser to increase the effectiveness of the treatment.

Testimonials

I had migraine headaches since I was 16 years old. I also suffered from insomnia, & since I was always in pain, I suffered from chronic fatigue syndrome, depression & anxiety. My other major complaints were acid reflux, heartburn, & upset stomach, I also had cramps in my hands from arthritis. After my first treatment, I slept all night, didn't wake up with a headache, & my hips were tender but not inflamed. I had no heartburn! It was amazing! My energy level is off the charts. My daughter said with this new treatment she didn't think she was going to be able to stand me. I am so energetic! I have now gone over a whole year with no migraine, no reflux & lots of energy.

In my opinion, it's worth a try. I wouldn't have believed the results if I hadn't done it for myself. The amount of pain I was in over the years has subsided, & I see a whole new world opening up to me.

Lisa C, Age 48

In 1981, I met Dr. Lyon & Shirley. I was taken to him at the age of fifteen by my sister & mother because I was hit by a car while riding my bike. In 1990, I was diagnosed with Asthma. For several years, I would average about five to six hospitalizations per year--for weeks at a time--due to Asthma complications. Throughout the years, I have averaged about one appointment at least every other week even if I am feeling okay, because I strongly believe in health prevention treatments.

Then, they purchased a laser therapy machine. This machine can find scar tissue of old injuries & allows fresh blood flow in those areas. These laser treatments have been helping me have better breathing days as well as less pain in the chest, lung & rib cage areas. I highly recommend the laser treatments.

MR4[®]
SUPER PULSED LASER
The leading health technology for
your patients and your practice

MR4 laser therapy with LaserStim from Multi Reliance Medical

The world's most advanced pain and wellness device

Treatment Modes

Innovations that improve the efficacy and power of treatment

Therapeutic Radiances of MR4

1. The super pulsed laser (905nm) produces high powered light in billionth-of-a-second pulses. The power of each pulse drives the photons, or light energy up to 10-13cm (4-5 inches) deep into the target tissue. The MR4's peak power of 25,000mW creates this high photon density, strongly reducing pain, improving micro-circulation and increasing healthy cell metabolism by generating adenosine triphosphate (ATP).
2. Pulsed broad band infrared emitting diodes (875nm) penetrate shallower tissue depths than the laser but provide a broader spectrum of coverage.
3. Pulsed red light (660nm) reduces inflammation.
4. Static magnetic field keeps ionized molecules of tissue in a dissociated state, enhancing the body's potential to absorb energy at the molecular/cellular level.
5. LaserStim delivers electrical impulses and light through the skin and tissue, with the help of our exclusive TARGET technology.

LaserStim TARGET

LaserStim with TARGET (Treatment Area Recognition and Guidance Enhanced Technology) is the world's first FDA cleared device that combines laser/light therapy and electrical neurostimulation. LaserStim treats a wide range of injuries and conditions while managing chronic/acute pain and promoting lifetime wellness.

Based on the changes in tissue physiology, the LaserStim identifies optimal treatment areas and alerts you to them via an LED indicator and a sound alert. This lets you apply a measured dose of treatment for fast, easy and accurate care.

LaserSweep

The constant use of the same frequency, as found in continuous wave lasers, can cause the body's tissue to adapt to the laser's effects, thus limiting its therapeutic power. The MR4's LaserSweep varies its frequency to prevent the tissue from adapting.

MR4 laser therapy device promotes accelerated pain relief, healing and wellness

The goal of laser therapy is to deliver light energy units, in the form of photons, to damaged cells. The consensus of experts that photons, absorbed by the cells through laser therapy stimulate the mitochondria to accelerate production of Adenosine Triphosphate (ATP). This biochemical increase in cell energy is used to help transform cells from a state of illness to a stable, healthy state.

Treats more conditions effectively

Multi Radiance Medical devices have been used worldwide for over 20 years to treat a variety of conditions, including:

- Back Pain
- Spinal Osteochondrosis
- Sciatica
- Radial Carpal (Wrist) Arthritis
- Cervical Spine: Pain, Sprain, Strain
- Hip Joint: Arthritis, Arthrosis
- Hip Tendonitis
- Knee Joint Injuries
- Acute Patellar Tendonitis
- Achilles Tendonitis
- Calcaneal Spur
- Cervical Strain
- Elbow Joint Injuries
- Lumbar Pain
- Hip Sprain
- Plantar Fasciitis
- Sprains
- Contusions
- Hematomas
- Many more...

Drug-free
Non-invasive
Side-effect free
Easy-to-use
Controls inflammation
Speeds healing
Accelerates pain relief
Safe and effective
Increases joint mobility
Pain free treatment

The MR4 low level laser delivers healing photons to specific areas and depths of the tissue, using only FDA cleared modality that synergistically incorporates all of these therapeutic radiances:

- Super pulsed laser
- Pulsed broadband infrared SLDs
- Pulsed redlight
- Static magnetic field
- Electrical stimulation (LaserStim)
- 25,000-50,000mW of super pulsed laser power for fast and effective treatment
- LaserStim™ with TARGET™ (Treatment Area Recognition and Guidance Enhanced Technology identifies optimal treatment areas
- LaserSweep™ to increase effectiveness
- Higher degree of safety than Class IV lasers

A world of difference

- Used in 3,000+ hospitals
- In 10,000+ private practices
- Over 300 treatment protocols
- In 30 countries
- Used by professional, and college teams
