
Our Mission: We are committed to helping patients achieve an exceptional level of health, comfort and self-esteem.

Our Patient Philosophy

***Patients Who Appreciate the Best**

– Our Reason for Existence

The foundation of our practice is patients who understand that high quality preventive and restorative dentistry is the way to long term health and comfort. They believe that the treatment we recommend is in their own best interest, and realize that they bear the ultimate responsibility for their own dental health. In return for our best efforts, they agree to follow our advice, to keep their appointments and meet their financial obligations.

***Superior Services**

– Valued for comfort, function and esthetics

Our ultimate goal is to fulfill our patient's needs in a caring and sensitive manner and to generate a feeling of warmth and satisfaction for the patient and the dental team. We believe that a competent staff efficiently using quality materials delivers the best value. We strive to provide our patients with the ultimate benefit – to have attractive teeth that are functional and comfortable *for a lifetime*.

“It is a funny thing about life;
if you refuse to accept anything but the best,
you very often get it.”

– *Somerset Maughn*

***Continued Growth**

– Creating New Relationships

Our goal is to create the opportunity for anyone to become a quality patient by using policies that improve access to the finest dental care we can provide and by educating our patients about what treatment is available to them. We seek to increase the appreciation of our expertise in a dignified manner so that we can stimulate each patient's potential to obtain and appreciate the best.

“Destiny is not a matter of chance, it is a matter of choice.” – *Anonymous*

***The Future**

– Growth through Change

Dentistry is a rapidly changing discipline. Our commitment to our patients is to evaluate new products and procedures and to educate ourselves so that we may provide appropriate treatment at all times. We will attend whatever courses may be necessary to function at our highest level. The doctor will provide an atmosphere that is conducive to growth and learning and will make the financial investment necessary to promote this growth. We expect doctor, patient and staff to be better human beings as a result of their experience here.

“Obstacles are those frightful things you see
when you take your eyes off your goals.”

– *Anonymous*
